

INTERMEDIATE BULK CONTAINERS

Introduced over 50 years ago as an efficient alternative to traditional containers, the Liquitote is still the leading metal IBC in the market today. Hoover's advanced manufacturing technology provides a one-piece Liquitote body and single-seam welding, offering greater strength due to a 50% less weld area. Built to last in an ISO 9001 certified plant, this IBC's 10 gauge stainless or carbon steel construction and patented one-piece sloped bottom has made it the superior choice for storage and transportation in the oil and gas, chemical, and petrochemical markets. Reusable, easy to clean, and durable, the Liquitote is a sound investment which can be amortized over its life cycle.

DESCRIPTION

- UN/DOT compliant with UN markings
- 10 gauge, 304 stainless steel with 2B finish
- One piece body and single seam welding
- Sloped bottom for virtual 100% discharge
- 22-5/16" (566 mm) top manway with EPDM gasket and bolted clamp ring
- 3" fusible cap with lanyard
- 2" (50.8 mm) top bung fitting with EPDM gasket
- Stainless steel UN tag
- Heavy duty lifting lugs/stackable leg positioners
- 2" (50.8 mm) discharge assembly with 316 stainless steel one piece elbow, locking handle ball valve and plastic plug
- Full-length valve guard on side drain tanks
- 6-1/2" (height) (166 mm) radius corner legs with caps 9-1/4" (235 mm on center drain tanks)
- Three-way fork lift entry on side drain tanks
- 350 and 550 gallon models feature a one-piece body and single-seam welding
- Stackable

APPLICATIONS

Hoover stainless steel IBC's are rated UN31A for the transportation and storage of hazardous and non-hazardous liquid chemicals. Hoover IBCs are used for a variety of applications including:

- Combustible and flammable raw materials
- Solvents and solvent based chemical preparations
- Water treatment chemicals
- Oil and water based lubricants
- Down hole chemicals
- Paints and allied products
- Resins
- Pigments and dyes
- Cleaning and sanitation chemicals
- Pharmaceutical and food preparations
- Industrial organics

350 Gallon - Side Drain
Product Number 370494

550 Gallon - Center Drain
Product Number 372412

793 Gallon Center Drain
Product Number 372422

LIQUITOTE® THE ORIGINAL IBC

Liquitote, the leading stainless steel IBC on the market, is the original intermediate bulk container (IBC) of the liquid handling industry. Hoover introduced this revolutionary concept over 50 years ago as an efficient and sensible alternative to the use of 55 gallon drums. One 550 gallon Liquitote tank replaces ten drums minimizing the amount of handling required, which in turn, saves money and lowers the risk of liquid handling accidents.
